XM radio by far has been the most pleasant experience of my new vehicle. I can instantly get news, weather, & traffic information without having to wait for the top of the hour or commercial breaks. As a customer, I pay for this service. Do not regulate what radio services (& their content) I can & cannot pay for in the privacy of my own vehicle. I strongly urge the rejection of NAB petition 04-160. I am apalled at the effort to stifle this cutting edge service. Competition from XM radio services will only lead to indusrty improvements from local broadcasters. REJECT 04-160. Thank you.
